Proficient:

ReactJS • GatsbyJS • Contentful

JavaScript • PHP • Handlebars

HTML5 • CSS • SASS

MySQL • APIs • Sketch • Gulp

VSCode • PHP Storm • jQuery • Git

Github • Bitbucket • Jira

Familiar:

Google Cloud Platform • Java • iOS

Node • C++ • Jenkins • Netlify CMS

EXPERIENCE

CLEARLINK | SENIOR FRONT END DEVELOPER

Senior Front End Developer | December 2019 – Today

Front End Developer | January 2019 – December 2019

- Lead Engineer over new CMS project that is at the core of the business which will allow marketing to create, edit and maintain their websites
- Collaborate with Design Team to translate their core design system into something that can be used across our brands and still allow for uniqueness across sites
- Skills: Gatsby, React, Javascript, Handlebars, HTML5, APIs, VSCode, jQuery, Git, Github, Bitbucket, Sketch, Figma, Jira

CALLDRIP | FULL STACK ENGINEER

July 2016 - January 2019

- Built reliable, reusable, and efficient code/applications
- Engineered innovative and creative solutions while maintaining code integrity
- Documented design/development processes and policies
- Planned product releases and ensured updates ran smoothly
- Skills: Javascript, PHP, HTML5, CSS, MySQL, Google Cloud Platform, APIs, PHP Storm, jQuery, Git, Bitbucket

PROJECTS

CMSV3 | CLEARLINK

Lead Engineer charged with building out a new content management platform that would replace our current system. This was built using many tools such as Contentful, React, Gatsby, Storybook, Lerna, Gatsby Cloud, etc. This tool allows our marketers to build/create/edit content on our sites without the aid of a developer. Lead project without oversight and quickly became the subject matter expert regarding all things CSMv3.

INBOUND & DYNAMIC NUMBER TRACKING | CALLDRIP

Rebuilt a core product in Calldrip with two other engineers that allowed customers to purchase and configure inbound tracking numbers that could be used to measure call traffic as well as to dynamically track customers on their site. This rebuild included rewriting the databases that stored this information, scripts to move past data into the new infrastructure, and rebuilding the front end with a nice modal walk-through that was hooked up to Twilio's API for number searching and Chargify for purchasing.

ESTABLISH DESIGN | KODIA

As part of my efforts to enhance my skills, I partnered in a business venture providing web development services to small businesses. I played a crucial role in registering the business in Utah and creating a visually appealing website showcasing our client's portfolio. This experience enriched my skills and knowledge in web development, and in entrepreneurship and owning your own business. Overall, it was a meaningful opportunity that allowed me to demonstrate my expertise in entrepreneurship and web development.
